| NOTES                                                                                      |
|--------------------------------------------------------------------------------------------|
| RNK: Player's rank according to FantasyPros formatted by round and pick (so 1.3 means      |
| the 3rd pick of the 1st round, or #3 overall). Values that are struck through mean the ADP |
| is more than a round before the rank. Values that are underlined mean the ADP is more      |
| than a round after the rank; two underlines means two or more. Note; these ADP             |
| predictions do not apply to 2QB leagues!                                                   |
|                                                                                            |

X/Y/P: Number of weeks last year that a player scored to be a starter at the X level or better, Y level or better, or played. For example if X is 1, Y is 3, and a WR's X/Y/P number is 1/3/15 then they played 15 games, scored as a WR3 or better in 3 of them, and scored as a WR1 in one.

VAL: Player's projected weekly value relative to a baseline player (the number in parenthesis after each position in the title). Player cells are shaded based on the tiers of value.

PS: Positional scarcity, which is the percentage of positive value remaining in the positio after that player is taken.
